HIGH

Should be addressed

0

MEDIUM

Consider improvements

0

LOW

Minor issues

⚠️ Significant barriers found. Nothing blocks users outright, but 14 high-priority issues make these pages materially harder to use, and would be raised in a formal accessibility review.

WHAT THIS MEANS FOR YOUR VISITORS

Around 1 in 5 people has a disability that can affect how they use a website. On the pages we scanned, some of them cannot complete key tasks today — they will leave, and you will never see it in your analytics as anything other than a bounce.

Where the issues are

Number of individual problems found in each area, across every page scanned.

Priority action plan

Start here. These are the highest-impact fixes across the pages we scanned.

1

There's no visible focus indicator (5 places)

HIGH

2 Links don't say where they go (5 places)

HIGH

3 Embedded content has no title (2 places)

HIGH

4 Text is hard to read against its background

HIGH

Fixing these clears 4 of your 5 most serious issue types.

WANT THESE FIXED?

Results by category

Every automated check we ran, grouped by the part of the experience it affects. A category passes only when every check in it passed on every page scanned.

Images & Media

NEEDS ATTENTION

4 of 5 checks passed

Images, icons, audio and video have text alternatives so they still make sense to someone who can't see or hear them.

- ✗ Frames must have an accessible name (2 places) **HIGH** 4.1.2
- ✓ Documents must have <title> element to aid in navigation
- ✓ Images must have alternative text
- ✓ [role="img"] elements must have alternative text
- ✓ All touch targets must be 24px large, or leave sufficient space

Colour & Contrast

NEEDS ATTENTION

0 of 2 checks passed

Text stands out enough from its background to stay readable in poor light or with reduced vision.

- ✗ Elements must meet minimum color contrast ratio thresholds **HIGH** 1.4.3
- ✗ Links must be distinguishable without relying on color **HIGH** 1.4.1

Forms & Inputs PASSED

4 of 4 checks passed

Every field is clearly labelled, so people know what to type and screen readers can announce it.

- ✓ autocomplete attribute must be used correctly
- ✓ Form field must not have multiple label elements
- ✓ Form elements must have labels
- ✓ Select element must have an accessible name

Keyboard Access NEEDS ATTENTION

3 of 4 checks passed

The whole page can be operated with a keyboard alone, without getting stuck, and the focused item is always visible.

- ✗ No visible focus indicator (outline/box-shadow) on keyboard focus (5 places) **HIGH** 2.4.7
- ✓ Page must have means to bypass repeated blocks
- ✓ Interactive controls must not be nested
- ✓ Scrollable region must have keyboard access

Page Structure PASSED

4 of 4 checks passed

Headings, landmarks and lists are used properly, so assistive tech can navigate the page in a sensible order.

- ✓ Inline text spacing must be adjustable with custom stylesheets
- ✓ IDs used in ARIA and labels must be unique
- ✓ and must only directly contain , <script> or <template> elements
- ✓ elements must be contained in a or

Labels & Screen Readers NEEDS ATTENTION

15 of 16 checks passed

Buttons, links and controls have names that describe what they do when read aloud.

- ✗ Links must have discernible text (5 places) **HIGH** 2.4.4,4.1.2
- ✓ Elements must only use supported ARIA attributes
- ✓ ARIA commands must have an accessible name
- ✓ ARIA attributes must be used as specified for the element's role
- ✓ Deprecated ARIA roles must not be used
- ✓ aria-hidden="true" must not be present on the document body
- ✓ ARIA hidden element must not be focusable or contain focusable elements

+ 9 more checks passed

Language PASSED

3 of 3 checks passed

The page declares its language so screen readers use the right pronunciation.

- ✓ <html> element must have a lang attribute
- ✓ <html> element must have a valid value for the lang attribute
- ✓ lang attribute must have a valid value

Mobile & Zoom PASSED

1 of 1 checks passed

Content reflows and stays usable when zoomed in or viewed on a small screen.

- ✓ Zooming and scaling must not be disabled

Full breakdown

Every issue we found, worst first — what it is, who it affects, and what fixes it.

ISSUE	SEVERITY	PAGES	BUSINESS IMPACT	RECOMMENDATION
Embedded content has no title Images & Media · frame-title · WCAG 4.1.2 · 2 places	HIGH	1	Embedded content (video, map, form) has no title, so screen-reader users hear only "frame" and have no idea whether it is worth entering.	Add a title="". <iframe> description e.g. title="Product details"
Text is hard to read against its background Colour & Contrast · color-contrast · WCAG 1.4.3	HIGH	1	Text is hard to read for anyone with reduced vision, and for everyone on a phone in daylight. Low-contrast pricing, form labels and calls-to-action measurably reduce conversion.	Darken the text. The background ratio reaches 4.5:1 for large text (bold). Check too, not just 3:1
Links are shown by colour alone Colour & Contrast · link-in-text-block · WCAG 1.4.1	HIGH	1	Links are distinguished from surrounding text by colour alone, so colourblind readers cannot tell what is clickable.	Underline link or otherwise distinguish something other than colour (weight, icon) so readers can tell
There's no visible focus indicator Keyboard Access · focus-visible · WCAG 2.4.7 · 5 places	HIGH	1	There is no visible focus indicator, so keyboard users cannot see where they are on the page. Navigating becomes guesswork.	Don't remove outline (outline replacing it – :focus-visible box-shadow, contrast again
Links don't say where they go	HIGH	1	Screen readers announce these links as "link" with no destination. Customers navigating by links	Give the link a descriptive text, or add a label by describing the destination

ISSUE	SEVERITY	PAGES	BUSINESS IMPACT	RECOMMEND.
Labels & Screen Readers · link-name · WCAG 2.4.4,4.1.2 · 5 places			alone cannot tell where any of them go, so they stop.	destination — only links need name.

14 issues

15 items need a human check. Some things software genuinely cannot judge — whether text over a photograph is readable, or whether a custom component behaves the way it claims to. These are excluded from the counts above rather than guessed at. A manual review is the only way to settle them.
