MEDIUM

Consider improvements

0

LOW

Minor issues

⚠ Compliance at risk. We found 8 critical issues that block some people from using these pages at all. In this state the site would likely fail an ADA Title II or Section 508 review.

WHAT THIS MEANS FOR YOUR VISITORS

Around 1 in 5 people has a disability that can affect how they use a website. On the pages we scanned, some of them cannot complete key tasks today — they will leave, and you will never see it in your analytics as anything other than a bounce.

Where the issues are

Number of individual problems found in each area, across every page scanned.

Priority action plan

Start here. These are the highest-impact fixes across the pages we scanned.

1

Buttons don't say what they do (8 places)

CRITICAL

2 There's no visible focus indicator (5 places)

HIGH

3 Text is hard to read against its background (3 places)

HIGH

4 Tap targets are too small or too close together (2 places)

HIGH

Fixing these clears 4 of your 6 most serious issue types.

WANT THESE FIXED?

Our team can remediate all 22 issues and re-audit to confirm you're compliant.

Results by category

Every automated check we ran, grouped by the part of the experience it affects. A category passes only when every check in it passed on every page scanned.

Images & Media

NEEDS ATTENTION

2 of 3 checks passed

Images, icons, audio and video have text alternatives so they still make sense to someone who can't see or hear them.

✗ All touch targets must be 24px large, or leave sufficient space (2 places) HIGH 2.5.8

✓ Documents must have <title> element to aid in navigation

✓ Images must have alternative text

Colour & Contrast

NEEDS ATTENTION

0 of 2 checks passed

Text stands out enough from its background to stay readable in poor light or with reduced vision.

✗ Links must be distinguishable without relying on color (2 places) HIGH 1.4.1

✗ Elements must meet minimum color contrast ratio thresholds (3 places) HIGH 1.4.3

Forms & Inputs PASSED

2 of 2 checks passed

Every field is clearly labelled, so people know what to type and screen readers can announce it.

- ✓ Form field must not have multiple label elements
- ✓ Form elements must have labels

Keyboard Access NEEDS ATTENTION

3 of 4 checks passed

The whole page can be operated with a keyboard alone, without getting stuck, and the focused item is always visible.

- ✗ No visible focus indicator (outline/box-shadow) on keyboard focus (5 places) **HIGH** 2.4.7
- ✓ Page must have means to bypass repeated blocks
- ✓ Interactive controls must not be nested
- ✓ Scrollable region must have keyboard access

Page Structure PASSED

4 of 4 checks passed

Headings, landmarks and lists are used properly, so assistive tech can navigate the page in a sensible order.

- ✓ Inline text spacing must be adjustable with custom stylesheets
- ✓ IDs used in ARIA and labels must be unique
- ✓ and must only directly contain , <script> or <template> elements
- ✓ elements must be contained in a or

Labels & Screen Readers NEEDS ATTENTION

7 of 9 checks passed

Buttons, links and controls have names that describe what they do when read aloud.

- ✗ Buttons must have discernible text (8 places) **CRITICAL** 4.1.2
- ✗ Links must have discernible text (2 places) **HIGH** 2.4.4,4.1.2
- ✓ Elements must only use supported ARIA attributes
- ✓ ARIA attributes must be used as specified for the element's role
- ✓ aria-hidden="true" must not be present on the document body
- ✓ ARIA hidden element must not be focusable or contain focusable elements
- ✓ Elements must only use permitted ARIA attributes

+ 2 more checks passed

Language PASSED

2 of 2 checks passed

The page declares its language so screen readers use the right pronunciation.

- ✓ <html> element must have a lang attribute
- ✓ <html> element must have a valid value for the lang attribute

Content reflows and stays usable when zoomed in or viewed on a small screen.

- ✓ Zooming and scaling must not be disabled

Full breakdown

Every issue we found, worst first — what it is, who it affects, and what fixes it.

ISSUE	SEVERITY	PAGES	BUSINESS IMPACT	RECOMMEN
Buttons don't say what they do Labels & Screen Readers · button-name · WCAG 4.1.2 · 8 places	CRITICAL	1	These buttons are announced with no name. A customer using a screen reader cannot tell what the button does — if it is "Add to cart" or "Submit", the journey ends here.	Give the bu aria-label/ar describing v buttons nee
Tap targets are too small or too close together Images & Media · target-size · WCAG 2.5.8 · 2 places	HIGH	1	Tap targets are too small or too close together, causing mis-taps for anyone with limited dexterity or using a phone one-handed.	Make the ta 24×24px, or space arou link/button i: visible icon grow.
Links are shown by colour alone Colour & Contrast · link-in-text-block · WCAG 1.4.1 · 2 places	HIGH	1	Links are distinguished from surrounding text by colour alone, so colourblind readers cannot tell what is clickable.	Underline lii otherwise d something c (weight, icoi can spot the
Text is hard to read against its background Colour & Contrast · color-contrast · WCAG 1.4.3 · 3 places	HIGH	1	Text is hard to read for anyone with reduced vision, and for everyone on a phone in daylight. Low-contrast pricing, form labels and calls-to-action measurably reduce conversion.	Darken the background reaches 4.5 large text — Check hove just the defe
There's no visible focus indicator Keyboard Access · focus-visible · WCAG 2.4.7 · 5 places	HIGH	1	There is no visible focus indicator, so keyboard users cannot see where they are on the page. Navigating becomes guesswork.	Don't remov outline (outl replacing it · visible style with enough background
